

## Project Manager

We're looking for Project Managers to join our Project and Construction Management Division. Our Project and Construction Management Division partners with our clients and industry in the planning and delivery of significant facilities and infrastructure projects. This is a project leadership role where you will oversee the delivery of projects and development of team members to achieve successful outcomes for both our Clients and for Rare.

We are looking for talented project managers to join our team of leaders and shapers of excellence in the project profession, who are looking to mentor the next generation for the future, this is a Rare opportunity.

## About the Opportunity

Based in Tasmania with the need to travel statewide, you will be working with an energetic and high performing team, this position offers a variety of experience across various supply chains of the construction industry, and will see you involved in:

- Managing large, or complex projects and contracts
- Lead multi-disciplinary project team/s on infrastructure projects, from feasibility through to construction, with responsibility for delivery requirements including technical outcomes, regulatory requirements, budgets, and timeliness.
- Involvement with and exposure to generational projects
- Planning, scheduling and delivery of projects and programs, responsible for achieving time, cost and quality outcomes aligned to both Rare's and Clients objectives
- Exposure to mentoring with industry leaders who shape excellence in project management profession
- Mentor and guide junior project managers to progress their project management profession

## What you will bring to our team

This role will be ideal for someone who has a background in construction and/or infrastructure project management.

To be considered for this position you must possess the following:

- Minimum 3-8 years' experience in Project Management or Construction Management
- Project and contract management experience in managing resources and leading teams to agreed outcomes
- Excellent verbal and written communication and negotiation skills
- Conversant with working across various databases
- Current Drivers License
- Construction White Card
- AIPM CPPM Certification or equivalent
